

## Cloud Architect at Fibertide

At Fibertide you will be guiding SRE teams as they assist our clients with implementing and maintaining complex cloud systems. You will design purpose-fit solutions for international companies, from identifying business requirements, through the choice of technologies and tools, to defining operational procedures. Taking on both management and consulting responsibilities, you will continuously ensure that both our team's performance and the infrastructure we manage meet clients' needs exactly, and will actively look for opportunities to improve business value delivery at all fronts.

### We offer...

- a friendly atmosphere in a small company, where all voices matter,
- a chance to work in small, focused teams with highly-skilled and result-oriented people,
- working remotely or at our office, at a ratio that suits your preference,
- a low-stress environment where we do not let the pace of product development get on our nerves,
- very flexible working hours with virtually no constraints,
- private health care package, spacious office close to city center and time for personal development,
- 20-25k PLN B2B net FTE.

### We expect that you...

- have at least 8 years of experience designing and implementing cloud systems in multiple projects,
- are thoroughly familiar with most, if not all, AWS and GCP services, Kubernetes or other container orchestration platforms, web development practices, and low-level networking principles,
- can confidently design complex, multi-purpose systems and document your ideas with great detail, following all the best practices and architectural frameworks,
- are experienced with modern cloud management techniques and able to guide a team following them,
- have great communication skills and can take responsibility for business relationships with international clients,
- stay up-to-date with the newest cloud trends, and can adjust your advice and designs to new opportunities,
- can design, document and execute operational procedures and infrastructure audits,
- can efficiently manage a small team, organize their engagement, supervise their focus and priorities,
- are a great teacher and can efficiently share your knowledge not just with your colleagues, but also with client's teams,
- never give up when facing unusual problems and challenges,
- are a perfectionist, dislike compromises, and always thrive to deliver the best solution possible,
- are fluent and very confident in spoken and written English,
- live nearby or are willing to travel to our office in Wrocław at least every few weeks - while you can work remotely, we see great value in occasional meetings.

### Bonus points if you...

- can boast a degree in theoretical Computer Science,
- have interest or experience in machine learning technologies,
- are usually available during UTC+2 working hours.
