# fibertide

## **Cloud Software Engineer** at Fibertide

At Fibertide you will be implementing cloud-based infrastructure for complex applications, developing specialized data-processing software, advising our customers and their development teams on cloud-native solutions and developing in-house utilities for managing cloud systems. Companies from around the world will depend on your help to get the most out of the cloud, using systems designed by Fibertide. You will join our special cloud forces team, solving unconventional technical challenges that nobody else can tackle.

**We offer...**
- a friendly atmosphere in a small company, where all voices matter,
- a chance to work in small, focused teams with highly-skilled and result-oriented people,
- working remotely or at our office, at a ratio that suits your preference,
- a low-stress environment where we do not let the pace of product development get on our nerves,
- very flexible working hours with virtually no constraints,
- private health care package, spacious office close to city center and time for personal development,
- 7.5-15k PLN B2B net FTE.

**We expect that you...**
- are familiar with public cloud platforms and can build a simple application on AWS, GCP, or a similar cloud service provider,
- have some experience with server software maintenance and administrative tools on Linux,
- have implemented and/or deployed web applications at any scale,
- will impress us with your programming skills, regardless of the choice of technology,
- are interested in cloud technologies and system scalability, and eager to learn infrastructure management tools and the principles of software reliability engineering,
- have great communication skills and can efficiently share your workload with a small team,
- are comfortable sharing what you've learned and assisting your coworkers in areas you are more knowledgeable about,
- never give up when facing unusual problems and challenges,
- are a perfectionist, dislike compromises, and always thrive to deliver the best solution possible,
- are fluent in spoken and written English, to the point of comfortably participating in a technical discussion,
- live nearby or are willing to travel to our office in Wrocław at least every few weeks - while you can work remotely, we see great value in occasional meetings.

**Bonus points if you...**
- can work *outside* the agile framework,
- have experience managing a Kubernetes cluster,
- can boast a degree in theoretical Computer Science,
- have interest or experience in machine learning technologies,
- are usually available during UTC+2 working hours.
